## **Game Theory**

Game Theory is the study of strategy. Our emphasis will be on how models of strategy apply to common problems in politics. This will help students think about politics analytically, objectively, and deeply. No prior knowledge of the subject is needed, but I will assume that students have sufficient aptitude for high school algebra and abstract reasoning to move at a fairly quick pace.

The course begins with a brief introduction to discrete games (a theory of strategic choice applied to games with discrete choices). We illustrate the theory using several examples, then apply it to problems in international diplomacy and voter turnout. We will then examine repeated games and their effects on cooperation. The next section of the course introduces students to spatial voting models and how they help us understand things like behavior of the Supreme Court and passage of the Powell amendment. We will further study the anomalies of multiple dimensional spatial voting models, such as McKelvey's Chaos Theorem (a wild but fascinating discovery) and apply these models to the Russian Duma, stopping rules in committees, and the alleged vote trade in the election of 1824. In the end, students will understand some of the most advanced theories of strategy as it is applied to political science. They will also gain the tools needed to approach problems objectively and "scientifically."

### Polling

Occasionally, I will try to use Google Forms for in-class polling. That means you will login to a form to pick an answer. I will not know who answered what nor record individual responses. However, Google Forms will show us how the class responds in real time. The Google Form login is <https://forms.gle/M2sePUH1oecuCyTR7>. Please keep it in a handy location.

### Mental Health and Wellness Resources

If you or someone you know needs assistance, you are encouraged to contact Student Care and Outreach in the Division of Student Affairs at 706-542-7774 or visit <https://sco.uga.edu>. They will help you navigate any difficult circumstances you may be facing by connecting you with the appropriate resources or services.

UGA has several resources for a student seeking [mental health services](#) or [crisis support](#). If you need help managing stress anxiety, relationships, etc., please visit [BeWellUGA](#) for a list of FREE workshops, classes, mentoring, and health coaching led by licensed clinicians and health educators in the University Health Center. Additional resources can be accessed through the UGA App.

### Grading

Your grade will consist of your perusall grade, four homework assignments, a mid-term exam, and a final exam. I expect students to attend all classes and assume that you are mature enough to understand what happens when you miss a class. Ask another student for notes if you miss a class. I will not give out notes nor put them on the webinator. However, all assignments will be on ELC.

Although I generally think of 90-100 as an A, 80-90 as a B, etc., but since the university uses a plus minus system I use the following scale for overall grades:

|    |                |             |          |          |          |
|----|----------------|-------------|----------|----------|----------|
|    | A              | 92 or above | A-       | 90-91.99 |          |
| B+ | 88-89.99       | B           | 82-87.99 | B-       | 80-81.99 |
| C+ | 78-79.99       | C           | 72-77.99 | C-       | 70-71.99 |
| D+ | 68-69.99       | D           | 62-67.99 | D-       | 60-61.99 |
| F  | 59.99 or below |             |          |          |          |

**Perusall and Readings.** All required reading assignments are posted on [Perusall](#) – a social e-reader which encourages you to discuss the readings with other students. Each reading in Perusall is considered an assignment that you read, question, and comment on, worth 10% of your overall grade. Students often ask, “how does Perusall grade me?” The simple answer is it grades reading and discussion. Focus on “discussion,” not posting, and pay attention to its nudges to get full points. Note, each assignment (a.k.a., each reading) should be completed before the relevant class. To find the Perusall reading, click on the Perusall link in ELC.

**Home Work Assignments.** Each home work assignment is worth 10% of your grade. These assignment will help you practice the analytic skills taught in the course and help you prepare for the exams. Assignments will be posted on ELC roughly one week before they are due.

**Exams.** The preponderance of your grade comes from a mid-term exam and a final exam. Both may contain multiple choice, fill in the blank, problem solving, and essay type questions worth 25% of your grade each. The idea is to give you multiple types of questions to evaluate your understanding of the material, not your aptitude for a particular type of test question. A review sheet will be posted for each exam on ELC. The final is *not* cumulative. Note: up to 1/5 of each exam may come from the readings not covered in lecture, so keeping up with Perusall should pay off.

**Extra Credit.** I will assign in-class games for additional points. These games are designed to help students think about the differences between human behavior and game theoretic behavior. There are no make-ups for these demonstrations, so please attend regularly.

### Make-ups

Homework assignments require a fair amount of analysis time. Please plan ahead to avoid turning them in late. **Late assignments will be lowered one letter grade for every day they are late and will not be accepted after the next class begins.** This allows folks to get their homeworks back in a timely fashion. If an assignment is late, it would be a good idea to upload

it to ELC then email me so I know it is posted. Grades are lowered for every *day* they are late, not every class day they are late.

If you miss the midterm for a good reason, such as coming down with COVID, and your excuse is *pre-approved* by me, you will be allowed to complete a make-up exam. The make-up for the midterm will be at 4 pm on Friday, March 1, meeting in Baldwin 408. There is no make-up exam for the final. Make-up exams are more difficult than regular exams and should be avoided.

|                                    | <u>Date</u> | <u>Percent of Grade</u> |
|------------------------------------|-------------|-------------------------|
| PERUSALL (reading and discussions) | daily       | 10%                     |
| HOMEWORK 1 (two person games)      | Feb 7       | 10%                     |
| HOMEWORK 2 (step-good games)       | Feb 23      | 10%                     |
| MIDTERM EXAM                       | Feb 28      | 25%                     |
| HOMEWORK 3 (repeated games)        | Mar 22      | 10%                     |
| HOMEWORK 4 (spatial voting)        | Apr 26      | 10%                     |
| FINAL EXAM                         | May 1       | 25%                     |

#### Student Honesty

All academic work must meet the standards contained in “A Culture of Honesty.” Students are responsible for informing themselves about these standards before performing academic work. The penalties for academic dishonesty are severe and ignorance is not an acceptable defense. Also note that the course syllabus is a general plan for the course and that deviations announced to the class by the instructor may be necessary.

#### Readings

All readings are available through Perusall. The best way to learn this type of material is to solve problems on your own. The Dixit, Skeath, and McAdams text (on Perusall) is full of questions you can work through. The “solved” questions have answers available to students. I recommend you work through a number of them each week. It will help. Most of the other readings are shorter but analytical, which may require more than one read to be fully comprehended. Remember, if you work hard and complete all the readings, this should be a very rewarding course.

If you want a hard copy of the Dixit, Skeath, and McAdams textbook, it is available at the bookstore.

Dixit, Avinash, Susan Skeath, and David McAdams (2021) *Games of Strategy*, 5<sup>th</sup> edition. W. W. Norton & Company – earlier editions acceptable though chapter numbers may vary.

#### Disclaimer

The course syllabus is a general plan for the course; deviations announced to the class by the instructor may be necessary.

## Schedule of Topics and Readings

### I. DISCRETE GAMES

- Jan 8-10      **Introduction & Foundations**
- Jan 12      **Two-Person, Sequential Games**  
\*Dixit, Skeath, McAdams, Ch 2, “How to Think about Strategic Games.”
- Jan 15      *No Class. MLK Day!*
- Jan 17-22      \*Dixit, Skeath, McAdams, Ch 3, “Games with Sequential Moves.”
- Jan 24      **Application: Marbury v. Madison**  
\*Clinton, “Game Theory, Legal History, and the Origins of Judicial Review”  
*American Journal of Political Science.*
- Jan 26      **Two-Person, Simultaneous Games**  
- Feb 5      \*Dixit, Skeath, McAdams, Ch 4, “Simultaneous-Move Games: Discrete Strategies.”
- Feb 7      **Application: Government Reform**  
\*Geddes, Barbara. 1991. “A game theoretic model of reform in Latin American democracies.” *American Political Science Review.*
- Feb 9-12      **Incomplete Information Games**  
\*Dixit, Skeath, McAdams, Ch 9, “Uncertainty and Information.”
- Feb 14-16      \*Dixit, Skeath, McAdams, Ch 13, “Brinkmanship: the Cuban Missile Crisis.”
- Feb 19-21      **Step-Good Games and Voter Turnout**  
\*Cain and Dougherty, “Suppressing Shays’ Rebellion.” *Journal of Theoretical Politics.*
- Feb 23      **Application: The Political Machines**  
\*Reichley, Ch 7 & 10, *The Life of the Parties.*  
\*Jac Heckelman, “The Effect of the Secret Ballot on Voter Turnout Rates,” *Public Choice.*
- Feb 26      \*Catch-Up and Review.
- Feb 28      MIDTERM EXAM**

### **Repeated Games**

- Mar 1 \*Dixit, Skeath, McAdams, Ch 10, “The Prisoners’ Dilemma and Repeated Games.”
- Mar 4-8 *No class. Spring Break.*
- Mar 11 [Discount Factors](#) (video) – watch through Perusall.
- Mar 13 [Geometric Series and Infinite Payoffs](#) (video) – watch through Perusall.
- Mar 15 *No class. Public Choice Meetings.*
- Mar 18-22 \*Joel Watson, 1997, Ch 22, “Repeated Games and Reputation,” *Strategy: An Introduction to Game Theory*.

## **II. SPATIAL VOTING MODELS**

### **The Median Voter Theorem**

- Mar 25-27 \*Hinich and Munger, Ch 2, “The Spatial Model of Downs and Black,” *Analytical Politics*.  
\*Dixit, Skeath, McAdams, Ch 16, “Strategy and Voting,” pp. 652-657 only.

### **Application: The Median Justice**

- Mar 29 \*Bonneau et al. 2007. “Agenda Control, the Median Justice, and the Majority Opinion on the U.S. Supreme Court,” *AJPS*, 51(4): 890-905.

### **Multidimensional Spatial Voting Models**

- Apr 1-10 \*Hinich and Munger, Ch 3, “Two Dimensions: Elusive Equilibrium,” *Analytical Politics*.

- Apr 5 *No class. Midwest Political Science Association Meetings.*

### **Application: The Powell Amendment**

- Apr 12 \*Stewart, *Analyzing Congress*, Chapter 1 (pp. 33-35).

### **The Core**

- Apr 15-17 \*Ordeshook. 1986. *Game Theory and Political Theory*, sections 8.1 & 8.2 – focus on calculating the core in a spatial voting game. Skip alpha and beta core.

### **Application: Stopping Rules in Committees**

- Apr 19-24 \*Dougherty et al., 2018. “Stopping Rules for Majority Voting: A Public Choice Experiment,” *Journal of Economic Behavior and Organization*.

**Application: Vote Trading in the Election of 1824**

Apr 26 \*Jeffery Jenkins and Brian Sala, "The Spatial Theory of Voting and the Presidential Election of 1824" *American Journal of Political Science*.

Apr 29 \*Catch-Up & Review

May 1 **FINAL EXAM (12:00-2:00 pm)**
