PROJECTS

Moral and Evaluative Framing Research Proposal and Experiment

Collaboratively developed a research proposal that included an original research question about the effects of framing on participants' willingness to donate money during a humanitarian crisis and the policy relevance of the experiment's results.

Latin American Political Conflict Research Project

Utilized the Gini coefficient and relevant academic literature to evaluate the correlation between income inequality and conflict onset in Colombia and Venezuela in the mid-1900s

State-Sponsored Terrorism Research Project

Semester-long project that involved identifying state-sponsored terrorist organizations in the international community and proposing a policy solution based on current academic literature
