Welcome!

The current global pandemic has made it obvious that disease can profoundly threaten social order and prosperity. What may be harder to perceive is the crucial and complex role that governments play in preventing and controlling disease. Our purpose will be to better understand the link between political institutions and disease outcomes. We begin by asking why disease is such a difficult social problem. We then use contemporary and historical examples of successful and failed attempts at disease control to understand how governments respond in the face of this challenge.

How will you be graded?

I will administer three exams. These will be primarily multiple choice, though they may also contain some short answer items. The dates and area of focus for each exam are listed in Table 1. While the primary modules reflect the main focus of the exam, material from modules previously covered may appear on any exam. Good performance on the exams requires engagement with all of the course materials. For this online class no exam makeups will be offered. You will also be required to complete a data collection project on national responses to the COVID pandemic. Details on this assignment will be posted to ELC.
Table 1: Assignment information

</table>

All exams will be open from 9am to 9pm on the day listed.

Ground rules

You are responsible for being self-motivated, self-directed, active learners. I expect you to comply with university policy and use common sense. Your deep engagement, responsibility, and self-motivation are particularly important in the online format.

Goals and teaching philosophy

When this course is finished, you should:

- Understand how social choice concepts apply to disease control
- Be familiar with a wide range of examples of disease control, focusing on the role of governance
- Improve your ability to think critically about these topics

As your professor, it is my responsibility to create an environment that fosters your learning. This includes keeping materials up to date on the course elc, and otherwise providing a well-organized course. You are responsible for taking advantage of that environment. If any aspect of the course is impeding your learning, please communicate that to me in whatever way you feel most comfortable.

Course Schedule

Unless otherwise indicated, readings will be available via UGA’s electronic course reserves system (password: collective). Please let me know if you have trouble locating the readings.

---

1A note about my name: Feel free to call me Micah or Professor Redman or Professor Gell-Redman.
Foundations: May 13-15
