I. Course Description:

Government and politics impact our lives in many ways. Some are obvious, others almost invisible. The primary goal of this course is to introduce you to the scientific study of politics using the United States as the primary example. To this end the course is designed to provide you with an historical and conceptual background of politics in the United States as well as a scientific perspective for understanding the relationships between different levels and branches of government, the operation of these political institutions, and how citizens interact with government in the United States and the state of Georgia.

By the end of this course you should be able to:

- 1) Understand the constitutional foundations of United States (U.S.) government and how the Constitution sets the stage for political activity in the U.S.
- 2) Identify the different government institutions in the U.S., explain how they interact with each other and *The People* and how these interactions have changed over time.
- 3) Reconcile the opinions of the public and conduct of our elections with the governing actions taken by our representatives in government.
- 4) Evaluate the performance of one of your representatives in government and offer a strategic policy recommendation.
- 5) Understand how our humanity influences democratic politics in the U.S. and abroad.
