

INTL 7010:
TECHNICAL BACKGROUND FOR WMD NON-PROLIFERATION POLICY PRACTITIONERS
Fall 2022

Mondays, 12:40-3:40 PM, Candler 117

Walt Sansot: walt.sansot@uga.edu

Office Hours: Mondays 11:00 AM – 12:30 PM; Thursdays 7:00 PM – 8:30 PM via zoom
(Please email to schedule an appointment)

COURSE DESCRIPTION:

This class is designed to introduce MIP ISN students to the WMD proliferation threats of concern and the methodologies that are used to assess the proliferation technology behind various types of WMDs and the associated technical requirements for an effective WMD non-proliferation policy. Specifically, it will explain why certain items are controlled and the challenges associated with maintaining such controls. The unique aspect of this course is that it will offer a STEM-based understanding of the issue area, an increasingly essential component in the competitive government/NGO job market.

After this course, students will have acquired an understanding of technical topics related to WMD technology, including:

1. Foundations of an effective strategic trade control system
2. Multilateral Export Control Regimes and their application for preventing proliferation
3. An overview of basic science for nuclear, biological, and chemical processes for social scientists
4. The nuclear fuel cycle including Uranium enrichment and Plutonium separation
5. Chemical weapons agents and technology
6. Biological weapons agents and technology
7. Missile delivery systems
8. Emerging Technologies
9. Proliferation Risk Assessment Methodologies

TOPICAL OUTLINE FOR THE COURSE:

The course syllabus is a general plan for the course; deviations announced to the class by the professor may be necessary. A detailed course schedule and reading assignments can be found in the following pages, but a topical outline for the course includes lectures on the following:

1. Introduction of the course/Foundation of a Strategic Trade Control (STC) System
2. Overview of WMD Technology and global WMD non-proliferation efforts
3. Multilateral Export Control Regimes and the EU Control List
4. Nuclear Fuel Cycle Technologies
5. Nuclear Weapons Technology
6. Chemical Weapons Technology
7. Missile Systems Technology
8. Biological Weapons Technology
9. Emerging Technologies
10. Assessing Proliferation Risk

ATTENDANCE AND CLASS BEHAVIOUR POLICY:

This class will be highly interactive. As such, class attendance, punctuality, and participation are required to succeed. Therefore:

- **Regular attendance** is expected. Two unexcused absences will be permitted, but the professor must be notified of each absence ahead of class. ½ final letter grade penalty will incur for each additional unexcused absence. Valid excuses include illness (doctor's note required) and family emergencies.
- **Punctuality** to class is a must. Late arrivals to class interrupt both your fellow students and your professor. If you have a situation where you will be habitually late, please notify the professor as soon as possible. Repeat latecomers will incur a ½ final letter grade penalty.
- **No computer use during class (in classroom).** You must silence, and put away, any and all wireless devices you bring to class.
- **Each student is responsible for contributing to a positive learning environment:** students are expected to behave in a courteous, professional manner towards each other and towards the professor. While in class, students are expected not to fall asleep, use laptops unless permission is given by the professor, carry on personal conversations, read the paper, use cellular phones/text, or complete assignments other than what the class is working on. If you engage in any of these behaviors, you may incur a ½ final letter grade penalty for each occurrence.

ASSIGNMENTS:

The course is assessed by four modules – outlined below. **You are responsible for assignments whether or not you are in class the day they are due.** Should you miss class and wish to receive credit for an assignment due that day, you are required to turn in the assignment to the professor **before class via email.** I will use the 100-point grading system. Students will receive a letter grade for their final grade according to the following cutoffs:

A ≥ 93; A- ≥ 90; B+ ≥ 87; B ≥ 83; B- ≥ 80; C+ ≥ 76; C ≥ 70; C- ≥ 68; D ≥ 60; F < 60

Reading assignments will be posted in eLC.

1. Topical Quizzes (25%)

There will be 2-3 topical quizzes throughout the semester. These will not be announced ahead of time, which is why reading for every class is important, as well as mandatory attendance to each class. Quizzes will be performed online in eLC. **If students are absent during any of these topical quizzes, they will receive a grade of zero for this assessment.**

2. Seminar Presentation (30%)

On the last day of class, students will present their end of semester presentations to the rest of the class. Presentations should be no more than 15 minutes long and should outline which of the issues discussed in class pose the biggest threat to U.S. and international security, and why. Specific issues areas will be assigned to the students at the beginning of the semester to avoid any repetition. **PowerPoint presentations need to be emailed to Mr. Sansot by 9AM on December 6. Late submissions will result in a grade of zero for this assessment.**

3. Policy Briefs (30%)

Brief 1: Students will prepare a brief that addresses a historical WMD policy and technical challenge – there are many from which to choose. Students may select any WMD-related policy issue that has an international dimension, but it must discuss both the policy and technical challenges. Additionally, students should address whether the policy approach used by said organization was correct and what they would have recommended for improved implementation. These double-spaced five (5) page briefs are to be written for persons that will be briefing the National Security Council (NSC) Chairman. You will be expected to (1) outline the technical and policy scope of the issue, (2) assess international implications, and (3) offer policy recommendations with justification.

- Policy brief 1 is due in class on Monday, October 24th.

Brief #2: Students will prepare a two-page policy brief that will be utilized the brief the POTUS on a recommended course of action pertaining to an emerging technology that poses a new proliferation threat.

- Policy brief 2 is due in class on Monday, November 21st.

Policy papers should follow the format provided in INTL 6000. These assignments will be emailed to the professor prior to class on the day that they are due. Late submissions will result in a grade of zero for this assessment.

4. Weekly Question and Class Participation (15%)

Active class participation is required. Students who are not presenting will be expected to keep up with the readings and to participate actively in the discussions. **Participation is based on class behavior, preparedness, and engagement with the material presented in class.**

All students will be required to come to class each week with one question to pose to the rest of the group about the week's topic. These questions will be collected in class at the beginning of the class – 12:40PM. They will not be accepted electronically. Additionally, the professor will pose one question each week via email. Students are expected to respond by the next classroom session. Failure to do so will result in a grade of zero for this assessment.

DEADLINES:

These deadlines are absolute – **NO EXTENSIONS ARE GIVEN.** Failure to turn in any of the assignments by the due date will result in a grade of zero for that particular assignment. In order to avoid a penalty for late submission of a paper, you must have evidence of extenuating circumstances (e.g., a doctor's note for illness). This must be submitted to the professor prior to the time of the deadline.

ACADEMIC HONESTY POLICY:

As a University of Georgia student, you have agreed to follow the University's academic honesty policy, "A Culture of Honesty," and the Student Honor Code. All academic work must meet the standards contained in "A Culture of Honesty" found at: <https://honesty.uga.edu/>. Lack of knowledge of the academic honesty policy is not a reasonable explanation for a violation.

Questions related to course assignments and the academic honesty policy should be directed to the professor.

RETURN OF GRADED BRIEFS

The aim is to return graded briefs within 2 weeks after the submission date. Papers will be returned to you with an indicative letter grade, ranging from A-F. **ONCE A GRADE IS AWARDED, UNDER NO CIRCUMSTANCE WILL IT BE CHANGED.**

FERPA

The Family Educational Rights and Privacy Act (FERPA) protects the privacy of your educational record. Please e-mail me to make an appointment during my office hours to discuss your grades should you have any questions or concerns. I will not discuss your grades in class.

Course Schedule and Deadlines:

Date	Week	Topic	Deliverable
8/22	1	1.0 Intro	Pre-Read Syllabus
8/29	2	1.1 Foundations of STC	Weekly Question
9/5	3	Labor Day – No Class	
9/12	4	1.2 MLRs and the EU List	Weekly Question
9/19	5	2.1.1 Nuclear Principles	Weekly Question
9/26	6	2.1.2 Nuclear Fuel Cycle	Weekly Question
10/3	7	2.1.3 Nuclear Weapons Technology	Weekly Question
10/10	8	2.2 Chemical Weapons Technology	Weekly Question
10/17	9	2.3 Missile Technology	Weekly Question
10/24	10	2.4 Biological Weapons Technology	Weekly Question/Policy Brief #1
10/31	11	2.5 Emerging Technologies	Weekly Question
11/7	12	3.1 Assessing Proliferation Risk: Overview	Weekly Question
11/14	13	3.2 Assessing Proliferation Risk: Analyzing the End User	Weekly Question
11/21	14	3.3 Assessing Proliferation Risk: Analyzing the End Use	Weekly Question
11/28	15	4.0 Capstone	Weekly Question/Policy Brief #2
12/5	16	Final Presentations	

REQUIRED READINGS:

A list of readings has been provided for each week. Students are expected to read everything on the list since the readings will facilitate class discussion and enhance understanding of the topics covered in class. Students are expected to come prepared to class each week to discuss the issues raised from what they have read with their fellow students and instructor(s).

Books:

1. CBRN Protection: Managing the Threat of Chemical, Biological, Radioactive and Nuclear Weapons – Andre Richardt, Birgit Hulseweh, Bernd Niemeyer, Frank Sabath; ISBN 978-3-527-32413-2
2. Globalization and WMD Proliferation: Terrorism, Transnational Networks, and International Security – James A. Russell and James J. Wirtz, ISBN-978-0-415-433945
3. Peddling Peril: How the Secret Nuclear Trade Arms America's Enemies – David Albright, ISBN-13: 978-1476745763; ISBN-10: 1476745765
4. The Challenges of Nuclear Non-Proliferation - RICHARD DEAN BURNS AND HON. PHILIP E. COYLE III, ISBN-13: 978-1442223752, ISBN-10: 1442223758
5. Preventing Black Market Trade in Nuclear Technology – Bunn, Malin, Potter, Spector, ISBN-13 978-1-107-16376-8
6. Innovation, Dual Use, and Security: Managing Risks of Emerging Biological and Chemical Technologies – Jonathan B. Tucker ISBN-13 978-0-262-51696-9

Bonus Reading:

1. Illicit: How Smugglers, Traffickers and Copycats Are Hijacking the Global Economy – Moises Naim, ISBN-13: 978-1400078844; ISBN-10: 1400078849

CLASS READING ASSIGNMENTS:

Week 1: Introduction and class overview

Module 1.0.0 and 1.0.1

Required Reading:

- CBRN Protection; Chapter 1
- Strategic Trade Review 01 – 01 Defining Effective Strategic Trade Controls at the National Level; Dill and Stewart
- Video: “Nuclear Tipping Point” (54 minutes): <https://vimeo.com/20532059>
- Text of the NPT: <https://www.armscontrol.org/treaties/nuclear-nonproliferation-treaty>
- Text of the BWC: <https://www.armscontrol.org/treaties/biological-weapons-convention>
- Text of the CWC: <https://www.armscontrol.org/treaties/chemical-weapons-convention>

Suggested Reading:

- Wisconsin Project: <https://www.wisconsinproject.org/>
- 26 Countries’ WMD Programs; A Global History of WMD Use: <http://usiraq.procon.org/view.resource.php?resourceID=000678>
- IAEA Safeguards Serving Nuclear Non-Proliferation, June 2015: https://www.iaea.org/sites/default/files/safeguards_web_june_2015_1.pdf
- Fact Sheets: Treaty Membership and Signatory Status of NPT, CWC, BWC: <http://www.armscontrol.org/factsheets/treatymembership>

Please read the syllabus and come to week 1’s class with any questions you may have about the syllabus and the class

Week 2: Foundations of Strategic Trade Control Systems

Module 1.1.0

Required Reading:

- CBRN Protection: Chapter 2
- Book: Globalization and WMD Proliferation
- WCO Strategic Trade Control Enforcement Guide; downloadable at: <http://www.wcoomd.org/en/topics/enforcement-and-compliance/instruments-and-tools/guidelines/wco-strategic-trade-control-enforcement-implementation-guide.aspx>
- STR 03, Autumn 2016; 02 – Free Zones and Strategic Trade Controls, Viski and Michel,
- Complying by Denying: Explaining Why States Develop Nonproliferation Export Controls; Stinnett, et al., <http://www.ikarreth.net/files/stinnett.etal.2011.pdf>

Suggested Reading:

- Text of the JCPOA: <http://www.iaea.org/sites/default/files/gov-2015-72-derestricted.pdf> NRC Fact Sheet on Dirty Bombs, December 2012: <http://www.nrc.gov/reading-rm/doc-collections/fact-sheets/fs-dirty-bombs.html>
- Kenneth Katzman and Paul K. Kerr, “Iran Nuclear Agreement,” Congressional Research Service, May 31, 2016: <http://fas.org/sgp/crs/nuke/R43333.pdf>

Week 12: Assessing Proliferation Risk: Overview

Week 13: Assessing Proliferation Risk: Analyzing the End User

Week 14: Assessing Proliferation Risk: Analyzing the End Use

Week 15: Capstone: Putting it all together

Week 16: Final Presentations

Presentations should be no more than 20 minutes long and should outline which of the issues discussed in class pose the biggest threat to U.S. and international security, and why. **PowerPoint presentations need to be emailed to Mr. Sansot by 9AM on December 5. Late submissions will result in a grade of zero for this assessment.**
