Course Objectives

Technology is one of the most powerful forces in our political and social world. In this course, we attempt to understand how technology has shaped, and continues to shape political values and international political orders with an eye towards what we might be headed for in the future. Through philosophy, social science and fiction, we will try to understand the role that technology plays in shaping the state in democratic and authoritarian nations in the past and then turn our attention to the future, exploring technological innovations hatched during the digital revolution such as artificial intelligence, which are transforming our society and culture at this very moment.

What I hope that students will take away from this class is not only an understanding of the role of technology in politics, but a warning about some of the very real dangers that technology poses to human freedom and dignity if we are not vigilant.

Attendance and Participation

The most important content from this class will come from the lectures and group assignments during lecture time. Because of this and the rather technical nature of this class, attendance and participation in class is important. If you cannot attend a lecture, you must present me with a valid excuse at least 24 hours prior to the start of class unless the situation you encountered was an emergency.

Grading Items

- Attendance: 10 Points
- Participation
 - Discussion leader : 20 Points. +2 Points Extra Credit for signing up more than once.
 - Think-pair-share in-class group activity: 10 Points
- 3 Short Exams/Quizzes: 20 points. (10 points each, **lowest exam dropped**) - Short, **open book quizzes of course content**. Will be multiple choice and short answer and to be completed in 30 minutes in class.
- A final group project (details posted on eLC):
 - Final group project proposal: 10 points.

Late Policy

You will lose a total of 2 points for each day an assignment is late without excuse.

Discussion Leaders

Either individually or in groups of 2 students will choose a week to be a “discussion leader.” Discussion leaders will lead the class discussion for that week by choosing a reading and preparing a 15-25 minute presentation summarizing the reading and proposing a series of 3-5 discussion points to start off our discussion about the content.

Every student MUST participate in a group as a discussion leader at least once.

If you sign up as a discussion leader more than once you will receive extra credit equivalent to +2 points on your final grade. Each group can be a discussion leader a MAXIMUM of 2 times.

Discussion leader groups can have a maximum of 3 people and if you do not sign up for one week as a discussion leader you will be assigned to a week.
