## **I. Course Description:**

This course is a college level introduction to government and politics. The primary goal of this course is to introduce students to the scientific study of politics using the United States and Georgia as the primary examples. To this end the course is designed to provide students with an historical and conceptual background of government and politics as well as a scientific perspective for understanding the relationships between different levels and branches of government, the operation of these political institutions, and how citizens interact with government in the United States and the state of Georgia. While much of this course focuses on governing and political institutions at the federal level and the State of Georgia perhaps the most important lessons will cover the role you, as a citizen or resident, play in the shaping of these institutions and the outcomes we observe in American politics.

By the end of this course you should:

- 1) Understand the constitutional foundations of United States (U.S.) government as well as the and how the Constitution sets the stage for political activity in the U.S and Georgia.
- 2) Identify the different government institutions in the U.S., explain how they interact with each other and *The People* and how these interactions have changed over time.
- 3) Understand the institutional arrangements and powers of the government of The State of Georgia.
- 4) Reconcile the opinions of the public and conduct of our elections with the governing actions taken by our representatives in government at both the federal level and in The State of Georgia.
- 5) Evaluate the performance of one of your representatives in government and offer a strategic policy recommendation.
- 6) Understand how our humanity influences democratic politics in the U.S., Georgia, and around the world.
