STUDENT LEARNING OUTCOMES

This course is designed as an overview of theories, concepts, and issues underlying the modern international system. We will primarily focus our attention on globalization - its meaning and impact on international relations into the 21st century - as discussed through theoretical paradigms, historical context, and structures and processes within the international system. Additionally, we will apply these concepts to practical issues and global debates facing world leaders in order to understand the forces that construct international relations.

The course will be divided into two sections. The first section leading up to the midterm exam will provide foundational knowledge of theoretical and historical perspectives in international relations. The second section to conclude the course will be devoted to applying this knowledge to modern structures and processes in the international system and relating these processes to some of the major global debates facing world leaders into the present day. A few examples of global debates we will discuss include the use of precision strikes in modern warfare, the Ukrainian and Rohingya refugee crises, and the legality and effectiveness of humanitarian intervention.

EXAMS AND ASSIGNMENTS

TESTS AND QUIZZES

You will have one quiz available most weeks during the semester reviewing the readings for that week, with 14 available in total. I will take the 10 highest-scoring quizzes to include your final grade. Each quiz will be worth 2 points of your final grade, totaling 20%.

You will have two exams in this course, the midterm and the final exam. Both your midterm and your final will be worth 15% of your final grade. Details about the exams will be announced during optional review class sessions prior to each exam.

ASSIGNMENTS

You will have two primary assignments – the Theoretical Paradigms Chart (due by the Midterm) and the Autobiography Presentation (due before the Final). Details for each assignment are below.

Theoretical Paradigms Chart

During the first half of the course until the midterm exam, students will be expected to compile a comprehensive chart of the seminal theoretical paradigms in international relations, to be turned in online with the midterm. This chart should include basic identifying themes and characteristics of each theory, along with examples of scholars associated with each paradigm. A template is available on eLC and all fields must be completed accurately for full credit. Students may use this chart-formatted template or a bulleted list, as long as each field is labeled and completed for each paradigm. This assignment will constitute 15% of the final grade.

Autobiography presentation

The last assignment will require you to engage with external literary material. I will provide a list of potential books - primarily autobiographies - prior to the midterm for your review. We will be discussing international relations through the lens of human security in this course; these autobiographical selections will each narrate an individual's personal experiences related to a particular violation of human security, a particular international or civil conflict, or another particular international issue. After the midterm, you will be divided into groups and asked to select one book, either from the list I provided or one of your own selection *with prior approval*.

Read the autobiography, and research supplemental information concerning the international conflicts or issues discussed, which may include other books, reputable news articles, academic journal articles, or similar. By the end of the semester, your group will submit an audio-visual presentation online connecting this book to themes of the course. A detailed rubric including expectations for this presentation will be provided closer to the scheduled assignment. This presentation will constitute 15% of your grade.

SIMULATION PARTICIPATION

The last 15% of your grade will constitute participation in an ongoing simulation. We will have activities once a week, usually on Friday, as well as ongoing discussions throughout the semester related to the simulation. More details will be provided at the start of Week 3.

In order to get full credit, you must attend class on simulation days, demonstrate some degree of participation in activities, and engage in *respectful, mindful dialogue* throughout the semester. Participating in class by asking questions, making thoughtful comments, and adding new information is important for everyone's continuing education. Discussions are intended for the mutual benefit of all students; disrespectfulness will not be tolerated.

ATTENDANCE POLICY

Attendance will be taken randomly throughout the semester. Absences will only be excused for the following, discussed with me in advance: observance of a religious practice, documented (by a doctor or health clinic/hospital) sickness, or death of a relative or close friend. More than three cumulative absences without an above listed excuse will affect students' attendance and participation grades. Three unexcused absences are permitted without penalty. However, the fast-paced nature of this course and the use of supplemental materials in class, which will also appear on exams, will make it more difficult for students to do well in this course without being present.
